

# Congratulations on Becoming an Apprentice!

You'll need good math and communication skills for your work and your studies.

## Are you prepared?

There's help available to build your skills so you can:

- Prepare for your in-school studies
- Succeed in your in-school program
- Pass your Certification of Qualification exam

## Don't be afraid to ask for help!

**EMPLOYMENT  
ONTARIO**

Your job is out there. We'll help you find it.

This Employment Ontario Project is funded by the Government of Ontario

# Construction Sector

# Are You Ready for School?

## Check to see.

### Try answering these questions...

1. A worker is asked to move 75 pallets. After 3 hours, 45 pallets have been moved. What percentage of the job remains?
2. In which one of the following qualities is a blueprint superior to a photograph?  
**A.** precision  
**B.** proportion **C.** appearance **D.** colour
3. It is estimated that a job requires 255 square feet of carpet. If an additional 20% is allowed for waste, what is the total amount of carpet needed?
4. Pick the word that means the same or about the same as the underlined word. A template is:  
**A.** metal cutting saw **B.** pattern  
**C.** formula **D.** special ruler

### Did you know?

*You need at least 70% to pass a trade exam.*

There are **FREE** programs in your community to help build your math and communication skills so you can be successful.

Programs are:

- Available at night, during the day and online
- Flexible to suit your individual needs
